Highlights	Description
<ul style="list-style-type: none">▪ Compact build up▪ Zero backlash at optimised fit between speed and resolution▪ Integrated limit switches▪ Fast delivery▪ Robust control without feedback system	<p>The RasuunDrive® HighAcc 10mm - type 2 micro positioning system offers a travel range of 6 mm. The system is driven by a stepper motor with 20 steps per rotation in an open loop control. Directly connected to the motor is the heart of the system, a zero-backlash MaalonDrive® gear with a reduction ratio of 160:1; connected to this is the spring-loaded, zero-backlash spindle nut system with a pitch of 0.4 mm. The end positions are monitored by two magneto-resistive limit sensors; the linear movement is supported by a preloaded ball guide. The connection adapter for attaching the micro linear actuator system is an M6x0.5 thread; the load is coupled via an M3x3.5 thread.</p>
